STUDENTS' COUNCIL TECHNICAL COMMITTEE

EVENT REPORT – an introductory session on 3D Printing

The Students' Council Technical Committee 2019-20, had successfully organized a workshop on 3D printing conducted by Prof. Dharendra Mishra Sir in Seminar hall 6 from 2 pm.

Through the workshop the students got to learn about the various applications of 3D printing in the industry and how various products are customized using this technology.

The speaker explained all aspects through a presentation and also videos of how each product is made in the industry at a higher scale were explained.

He also compared the cost aspects of 3D printing and how it has brought a change.

All the students were delighted to know about the applications required for 3D Printing, a total participation of 135 students was observed in the workshop.

In the end all the students got a chance to view all the products made in the 3D printing lab of MPSTME and the queries of the students were answered.
