PLACEMENT REPORT

MBA TECH 2025 - 2026

OVERVIEW

NMIMS has always thrived to define the new era as an amalgamation of Technology and Management. MBA Tech programme at MPSTME has understood the current dynamics of business of the 21st century and linked it successfully to develop and help students link the technology know-how to management concepts which has benefitted them to perform efficiently and effectively. This course has not only linked technology and management but is preparing students to head for the future through **Innovation, Creativity** and encouraging **Entrepreneurship**.

The MBA Tech is an integration of technology and management with the higher proportions of technological inputs in the initial stages and moving towards 'Technology Management' in the later stages of the course. SVKM's NMIMS has a reputation of producing the brightest students. In line with this legacy, the faculty members of MPSTME programme are characterized by high levels of learnedness and orientation towards research. They work hard to extract excellence from the students.

DEAN'S MESSAGE

Dr. Koteswararao Anne
Dean – MPSTME, NMIMS

The NMIMS University has always had a forward-looking, flexible approach to delivering quality education. In these challenging times when industry is undergoing major shifts, corporations expect engineers who can innovate, troubleshoot, and think critically. The pedagogy at MPSTME focuses on practice and theory beyond the classroom, ensuring students are grounded in fundamentals while developing root cause analysis abilities and creative problem-solving skills.

Learning on a multidisciplinary campus with students from diverse backgrounds and exposure to international and industrial teaching ensures our graduates are well-rounded individuals with practical skills and excellent teamwork abilities. Our rigorous curricula are complemented by extensive industry collaborations through connect programs, keeping academic offerings current and relevant.

We encourage experiential learning through state-of-the-art infrastructure laboratories, including robotics & automation labs where students gain hands-on experience on innovative, challenging projects. Students benefit from our EPICS (Engineering Projects in Community Service) and VIP (Vertically Integrated Projects) programs, providing real-world problem-solving opportunities while fostering social responsibility.

Our numerous student clubs and professional chapters offer rich opportunities for personal and professional development, cultivating essential life skills including leadership, communication, and project management. Faculty members bring vast academic and industry experience, bridging the gap between theoretical knowledge and practical application.

The placement season this year was a resounding success, reflecting the strong industry relevance and excellent opportunities for our students across a wide range of sectors. A diverse pool of leading organizations from across industries participated in the recruitment process, reaffirming their confidence in the quality, capability, professional competence and business acumen of our students. These successful outcomes are the result of the collective efforts of our students, faculty, alumni, and corporate partners. We are deeply grateful to our valued recruiting partners—both loyal associates and new collaborators—for their continued trust, support, and active engagement with our campus. We are confident that they will make meaningful contributions to their organizations, uphold the values of excellence and integrity, and serve as exemplary ambassadors of the institute across industries and geographies.
